A settlement that is very tough on Microsoft has been reached but the competition of Microsoft will not stop. The only reason for all of this was brought by Competitors of Microsoft who could not overtake Microsoft in regular business methods so they got the government to cost Microsoft a lot of money and to stop them from doing research and development. They had to stop regular business and just defend themselves from the government who is acting on behalf of Microsoft competitors. Enough is enough. Put a stop to this and let one of our major resources go back to developing and manufacturing. Thanks.
